# **MODEM / FAX CONTROLLER**

## **MODEL M/F-1**

### **(Touch-Tone Only)**

#### **APPLICATION**

The model M/F-1 is designed to allow two analog communication devices for example

- Fax and Modem
- Fax and Phone\*
- Modem and Phone\*
- Credit Card Terminal and Phone\*
- Credit Card Terminal and Fax
- Credit Card Dialer and Modem
- ATM and Credit Card Terminal
- ATM and Fax
- ATM and Phone\*
- ATM & Modem

to share the same central office line without interruptions. Priority and privacy is given to the first communication device to access the line. No external power supply is required. The application area is in c-stores, banks, energy companies and ATM with State Lottery Machine installers.

#### **INSTALLATION**

The M/F-1 Modem/Fax Controller unit connects to a standard telephone line, the station port of a hybrid key system or PABX. Just plug the six 6" modular line cord into a standard telephone line jack or extension port and connect the two communications devices into the assigned ports. The model M/F-1 unit is wall mounted via two (2) #6 x 3/4" pan head self tapping screws provided. See figure #1.

Test the unit by going off hook device #1 complete a call and make sure device #2 does not interfere. If sharing with Fax set second device with higher # of rings before answering.

**\*(Standard or Payphone)**
